On Thursday last week the Peaks COVID 19 Response Committee sent a request to the Family Medicine Department of Maine Medical Center to consider having a screening capacity here on Peaks. The primary reason for the request is an interest in reducing the number of potential infected or already infected folks on the ferry. This is of critical concern because we already know that CBL is prepared to halt service in the event of crew attrition due to illness.

The committee is cognizant that screening capacity is in short supply across the nation but felt it was important to make the request.

The letter can be seen on NextDoor at: https://nextdoor.com/news_feed/?post=141430278
