

Peaks COVID-19 Response Committee Updates and Bulletins

We Should All Use Face Masks

The CDC is recommending the use of cloth face masks when folks will be in close proximity of others when social distancing is difficult, like at the grocery store, at pharmacies, in the supermarket, on the ferry, at work, etc.

As we are all aware, COVID 19 is already on Peaks Island. Please help reduce its further spread by using a face mask.

Face Masks for Islanders being Collected for Distribution

The Peaks COVID 19 Response Committee is encouraging islanders who are able to make masks to do so and to make them available for distribution to others.

If you have masks to share, please call Fred Keefe at 766 2300 to arrange for drop-off at the shed in the Saint Christopher's parking lot.

As soon as there is a bit more of an inventory, a schedule for pick-ups will be published. We have nearly 100 masks already.

Masks will be limited to one per household member as long as supply lasts.

Special thanks to the Saint Christopher's Church congregation for making this effort possible.

Instructions for making masks, with or without access to a sewing machine, are provided by the CDC by clicking [HERE](#).
