

## Peaks COVID-19 Response Committee Updates and Bulletins

### IMPORTANT UPDATE

#### Face Masks for Islanders Now Being Collected

The CDC is now recommending that folks wear face masks when out in public, especially in close spaces like grocery stores, mass transit, ferry boats, etc.

The Peaks COVID Response Committee has made arrangements for the collection and distribution of community produced masks here on the island.

Before distribution can begin, we need to build an inventory.

Would you consider making face masks that can be distributed to Peaks neighbors?

If you are already involved in making masks for off-island distribution, would you consider also making masks for fellow islanders? If you've got an inventory without a destination, would you consider making them available to neighbors?

If you are making masks or have masks to share, please call: Fred Keefe at 207-766-2300 and make arrangements with him to drop masks off at the Shed in the St. Christopher's parking lot.

Please do not leave masks without making arrangements with Fred to have masks put into the shed.

As soon as we have acquired somewhat of an inventory, we will publish hours during which masks can be picked up at the Shed.

Distribution of masks will be limited to one per each

household member.

Thank you.
