Dear Peaks islanders!

You may have just heard that Portland Public Schools will now be closed through the end of April. Here is the perfect opportunity for your student (or you, if you happen to be an island youth reading this) to contribute positively to the community. We are compiling a list of high school and college students who would be willing to help out with community efforts to minimize the spread of COVID 19, the first of which will be distribution of a flyer with essential information on COVID to every household on Peaks. If your child (or yourself) is interested, please enter contact information in the google document linked below! The work will likely begin early next week.
